

EternityWall

A team of professionals at your disposal
to study and implement solutions
for data certification on the Blockchain

Who we are

Eternity Wall provides consulting and data certification services through the Bitcoin Blockchain to public and private companies in several market sectors.

Born in 2016 from an idea of Riccardo Casatta, today Eternity Wall is a company composed of highly specialized experts in the Blockchain sector. The team can count on professionals who contributed in the creation of OpenTimestamps, the most widespread standard for data certification with the Blockchain, and collaborate with Peter Todd, prominent figure in the Bitcoin environment.

Our services

Eternity Wall offers a customized service that starts from training on the Blockchain sector up to the implementation and maintenance of the service in the customer's infrastructure.

1. **Training and education**
Lectures and specific courses to understand the potentialities of Bitcoin and Blockchain based applications.
2. **Dedicated OpenTimestamps API**
Eternity Wall allows you to access OpenTimestamps API rapidly and securely, thanks to its own authenticated API. The API allows to certify your data faster and benefit of a dedicated customer care service.
3. **Integration support**
During the integration, the client will be followed by a team of Blockchain developers. The integration process may also include the customization of the API in order to manage specific peculiarities of each client.
4. **Private OpenTimestamps servers**
Once completed the installation of the service components, Eternity Wall team can also take care of support, update and maintenance of the OpenTimestamps servers installed for the client, realizing reports and dashboards to visualize statistics.
