

FAQ

We are active in the sector X and we want to integrate the Blockchain in the process Y, does it make sense?

It depends on each specific case, Eternity Wall staff and third party experts can guide you in focusing on the company needs and in choosing the best solution.

Can I certify every kind of data?

Eternity Wall can certify every type of data. In general, it is good to understand which processes need a more urgent disintermediation.

I am interested in deepening how to use the Blockchain in my processes.

Eternity Wall team is expert in the decentralized certification of data and can help you to figure out which integration cases are more appropriate for your company.

There are no Blockchain developer in my company. Is it a problem?

It is not! Eternity Wall exists precisely for this reason: the Blockchain side is integrated in your company by our developers.

What happens if Eternity Wall fails?

The data certified through our API are lasting for the eternity and are completely independent from the the future of our startup.
All your data will be preserved thanks to the Blockchain.

Do I have any particular constraint during the integration?

In order to carry out the process is necessary that the company guarantees what specified in the quote fase: execution of services, personnel supply and assurance of resources.
